8. Next actions (this run)

- Re-run with wider corridor (e.g., 7pp) OR relax secondary caps (weight caps) minimally.
- If still RB_BREACH: increase k_block (add instruments) in the offending block(s).
- If Growth capacity constraints prevent W_growth: add satellites or relax max_weight_sat/core caps.
- Consider: increase liquidity, shorten duration, reduce high growth/HY exposure.
- MaxDD gate (strict): stress or realized drawdown exceeds mandate; weights not written. Adjust target_max_drawdown_pct, rc_block_targets, or universe and re-run.

9. Actions by status (reference)

APPROVED Use weights as target; safe to execute.

CANDIDATE_RB_BREACH Use with caution; consider re-run or accept and monitor.

OK_FALLBACK Check rc_breaches above; use if acceptable for mandate.

- FAIL_STRESS If strict_stress_gate: weights not written. Review defensive blocks, liquidity.
- FAIL_MAX_DD Weights not written. Adjust target_max_drawdown_pct or risk budget.

FAIL_DATA/RC/FEAS Weights not written. Follow next_actions above.
