

IPS Full Run Results Report

Report Scope

- **Source:** ips_summary.txt
- **Document type:** Run output summary
- **Mandate context:** Aggressive profile, USD investor, 10-year horizon

Mandate Parameters

Parameter	Value
Target volatility (annual)	17.0%
Max drawdown limit	35.0%
Horizon	10.0 years
Investor currency	USD
Client profile	Aggressive

Run Status

- **Primary status:** CANDIDATE_RB_BREACH
- **RC breaches:** none

Final Portfolio Weights

Asset	Weight
VOO	0.263
ITA	0.135
SLV	0.123
SMH	0.093
COPX	0.063
URA	0.044
BIL	0.025
BBJP	0.020
GLD	0.020
QQQ	0.020
ROBO	0.020
VDC	0.020
VWO	0.020
ARMY.PA	0.019
BND	0.019
CIBR	0.019
SCHD	0.019
SCHP	0.019
VGK	0.019
VT	0.019
Sum	0.999

Risk Contribution by Block (actual | target)

Block	Actual RC	Target RC	Gap
Growth	83.92%	90.00%	-6.1 pp
Duration	0.16%	5.00%	-4.8 pp
Inflation	15.92%	5.00%	+10.9 pp

Stress Summary

Item	Value
Status	FAIL_STRESS
Fail reason	FAIL_ROLE_EQUITY_SHOCK
Worst scenario loss	-31.89%
Failed scenario	equity_shock

Violations

- RB_BREACH: Growth = -6.08 | Duration = -4.84 | Inflation = 10.92
- FAIL_STRESS: fail_reason_code = FAIL_ROLE_EQUITY_SHOCK | worst_scenario_loss_pct = -0.3189 | failed_scenario = equity_shock

Next Actions (from source)

- Re-run with wider corridor (e.g., 7pp) or minimally relax secondary weight caps.
- If RB breach persists, increase **k_block** in offending blocks.
- If Growth capacity constraints prevent target Growth weight, add satellites or relax max caps.
- Consider increasing liquidity, shortening duration, and reducing high growth/HY exposure.

Status Reference (from source)

- APPROVED: Use weights as target; safe to execute.
- CANDIDATE_RB_BREACH: Use with caution; consider re-run or accept-and-monitor.
- OK_FALLBACK: Check RC breaches; use if mandate-compatible.
- FAIL_STRESS: Under strict stress gate, weights are not written.
- FAIL_MAX_DD: Weights are not written; adjust drawdown constraint/risk budget.
- FAIL_DATA/RC/FEAS: Weights are not written; follow corrective next actions.

Conclusion / Key Takeaways

- Run output confirms a candidate portfolio with risk-budget mismatch and stress failure.
- Governance-ready interpretation should focus on block RC gaps and equity-shock resilience.
