8. Next actions (this run)

- Consider adding assets to dilute RC or relax rc_asset_cap; review breached tickers.
- Stress diagnostic (DIAG_*): review liquidity, duration, growth/HY — informational only.
- RC post-processing could not satisfy RC caps (strict mode: weights not written; permissive: violation flagged). Relax rc_asset_cap_pct, add assets, or set rc_policy_mode: permissive to write weights with violation.

9. Actions by status (reference)

APPROVED Use weights as target; safe to execute.

CANDIDATE_RB_BREACH Use with caution; consider re-run or accept and monitor.

OK_FALLBACK Check rc_breaches above; use if acceptable for mandate.

FAIL_MANDATE Historical MaxDD vs mandate failed or history insufficient; weights not written.

DIAG_* / FAIL_STRESS (violation) Stress diagnostics only; does not block release (review PM).

FAIL_DATA/RC/FEAS Weights not written. Follow next_actions above.
